

CERTIFER NORDICS IS HIRING ROLLING STOCK, INFRASTRUCTURE AND ENERGY ENGINEERS

CERTIFER is an international railway inspection, testing and certification company founded in 1997, expert in the mobility sector.

Our group, headquartered in Valenciennes (France), is present in ten countries with subsidiaries in Algeria, Australia, Belgium, Brazil, France, Italy, Spain, Germany, Austria, the Netherlands, China, Turkey and Norway with branches in the United Arab Emirates, Vietnam and Denmark.

Specialized in the mobility & railway industry, we provide our testing, inspection, and certification services to vehicle and component manufacturers, rail operators, infrastructure managers.

CERTIFER acts as a Designated Body (DeBo) in different countries, as a Notified Body (NoBo) at European level and is also recognized as an Independent Safety Assessment Body.

CERTIFER Nordics AS in Norway and its branch office in Denmark is growing and plan to recruit several new resources for its growing portfolio of third-party projects.

To strengthen its team in the Nordic countries, CERTIFER Nordics is looking to hire rolling stock, infrastructure or energy engineers to carry out the management and/or technical evaluation activities of fixed installations or rolling stock, NoBo or AsBo projects.

The engineers will be part of the Nordic team and will be based in Oslo, Norway or Copenhagen, Denmark.

Role and responsibilities

The engineers will play an important role in NoBo or AsBo projects related to rolling stock, infrastructure or energy or other third party projects and perform activities like:

- Project Manager
- Support the preparation of offers (technical and commercial)
- Detailed technical assessment
- Interact with the customer, other assessment bodies and railway safety authorities
- Ensure respect for company quality processes
- Participate in Scandinavian and international projects
- Perform on-site inspections
- Perform project audits

- Prepare relevant reports

It will also be beneficial if the engineers have experience/knowledge in

- Rolling stock, infrastructure or energy system engineering
- Extensive knowledge of the general railway regulations and TSIs related to subsystem rolling stock, infrastructure or energy
- Experience in project management
- Knowledge of Commission Decision 2010/713 on Modules
- Knowledge of Commission Implementing Regulation 402/2013 on CSM-RA
- Knowledge of CENELEC standards EN 50126, 50128 and 50129
- One or several of the Nordic languages (one is required)
- Other European languages
- Ability to work independently and as a team, set priorities and meet deadlines
- Ability to communicate with customers for inspections and business matters

What we offer in Certifer Nordics:

- Positive and dynamic environment in a growing company
- Possibility to join internationally projects within the Certifer Group
- CERTIFER Academy training
- Homework policy
- A modern office space centrally located in Oslo or Copenhagen
