

# Infrastructure TSI

34

## Seminar-No. 02.07

### DATES & COSTS

On-demand

Inhouse

Online

Length:

1 Day

Fee:

**750,00 €**

incl. lunch and certificate of participation  
plus VAT

### TARGET GROUP

- Technical project managers
- Design and technical staff
- Engineers, technicians

### LANGUAGES

### DESCRIPTION

This seminar provides an overview of the application of Infrastructure Technical Specification for Interoperability adopted by the Commission Regulation (Commission Regulation 1299/2014 (EU)). This TSI covers part of the infrastructure structural subsystem (along with TSI PRM and TSI SRT) and the part of the maintenance functional subsystem relating to the infrastructure subsystem.

At the end of this seminar, the people trained will be able to :

- Define the scope of application of the TSI according to the project
- Explain how a Notified Body mission is carried out
- Use the TSIs to identify the regulatory requirements
- List and identify the different annexed texts

### SEMINAR CONTENTS

#### DAY 1 09.00-17.00

- Scope of application of the TSI according to the project
- Notified Body mission
- Identification and assessment of the basic parameters and interoperability constituents
- Presentation of the different annexed texts
