TARGET GROUP

- Development, Safety, Quality and Approval Engineers
- Technical Project Managers, Operation Managers, Workshop Managers
- Staffs of the following departments:
Approval & Vehicle Technology

LANGUAGES

DESCRIPTION

Contents of this training are the German legal basics and the relevant requirements for the safety and approval process in terms of the BOStrab (Germany), in connection with the CENELEC standard DIN EN 50126-1 and DIN EN 50126-2.

The specific requirements of BOStrab (Germany), as well as the parties involved in the process and their responsibilities, are presented in detail and comparisons are made with the safety and approval processes in other European and non-European countries.

This training provides you with the necessary basic knowledge of the approval and safety process, as well as the verification methodology for safe operation and order of a streetcar vehicle on a specific network, from the derivation of the (safety) requirements to the corresponding verification documents.
