

CERTIFER Group is a French company founded in 1997. We are specialised in railway testing, inspection and certification (CERTIFER) on the one hand, and consultancy and advisory services on the other hand (CERTIFER Solutions).

With more than 300 employees and 24 locations worldwide, CERTIFER is present throughout Europe, as well as in China, Turkey, Brazil, Australia and in the Middle East.

CERTIFER main services include safety assessment as ISA (Independent Safety Assessment) and AsBo (Assessment Body) and conformity assessments as NoBo (Notified Body) and DeBo (Designated Body).

CERTIFER Solutions assists railway companies with their safety and quality management, regulatory issues, homologation and project management.

CERTIFER Solutions Norge AS is growing and is looking for both younger and more experienced employees from the railway or other industries. Some of what we do includes: RAMS, safety, reliability, risk and quality management, maintenance optimization, and technical verifications within transportation and railways.

Through expert assessments and consultancy, we assist well-known names such as Norske tog, Vy, Sporveier, SJ, Flytoget, and Bane NOR with safe, reliable, and trustworthy operations.

To reinforce our team/ our expansion in Norway, we are looking for a:

Consultants in transportation and railway

What we can offer you:

- The opportunity to work in a dynamic consulting environment within leading technology with a focus on railways and transportation.
- Being part of a well-established, skilled, and friendly team in Norway with strong consultancy expertise from former Scandpower, Lloyd's Register, and Vysus Group.
- An exciting and good working environment with a dedicated focus on professional development while having fun together.
- Proactive towards service and market areas through the development of methods and processes.
- Access to an international professional community and international projects. We have headquarters in France and a strong presence in Europe.
- Collaboration with a broad industry network within rolling stock acquisitions, operation, rolling stock suppliers, and railway authorities.
- Varied roles and projects that challenge and develop your skills.
- Good balance between work and leisure.
- You can work at one of our offices in Oslo/Bergen combined with remote work.
- Competitive terms and good opportunities for personal and professional growth.

As a consultant at CERTIFER Solutions Norge AS, you will have varied and challenging tasks depending on your specialization. It is an advantage if you speak and write a Scandinavian language.

If you have interest or experience in any of these areas, we would love to hear from you:

RAMS/RCM: Develop and conduct reliability analyses (FMECA, fault tree analyses, etc.), conduct Reliability Centred Maintenance (RCM) analyses, modern analytical approach to improvement and optimization of maintenance, condition based and OCM, development and improvement of maintenance programs and LCC (Life Cycle Cost).

Safety and Quality Management: Develop and establish safety management system in project and operation. Identify and analyse risks related to technical design and operation of railway systems. Implement and maintain quality assurance systems in accordance with industry standards. Conduct audits and inspections.

Technical Safety: Participate in design, development of reliability and maintenance of technical systems, analyse technical solutions to minimize risk and ensure compliance with standards.

ILS (LCC, Documentation, Training, RAM): Conduct Integrated Logistics Support (ILS) activities, life Cycle Cost (LCC) analyses, develop and maintain documentation, training materials, and support for reliability, availability, and maintenance (RAM) programs. Participate in training activities to ensure effective operation and management in the use of technical systems.

Rolling stock approvals: responsibility and management in approval processes of rolling stock with railway authorities, certification of technical systems, assess compliance with regulations and national and international standards, collaborate with relevant authorities and organizations to ensure approval of systems.

Maintenance Management and ECM: Implement and comply with regulations related to the responsibility structure in Entity in Charge of Maintenance (ECM), development of maintenance management systems.

Permits: ensure railway companies have necessary permits and approvals to operate within the railway industry, handle communication and approval with relevant authorities and regulatory bodies
