

Theoretical training of experts in the field of Technical Expertise "Installations for flammable liquids on rolling stock"

DESCRIPTION

In this course, you will gain basic knowledge on how to handle safety data sheets, on fire/explosion and other hazards caused by flammable liquids, and on the manufacture, installation, equipment and operation of fuel tanks. Furthermore, you will gain a brief insight into the relevant legal fundamentals. After successfully passing the examination, participants will receive a certificate of attendance.

For your convenience we would like to offer you on site/in house Seminars. Please contact us and let us know what would work best for you!

Seminar-No. 04.02
