

CERTIFER is a French company founded in 1997. We are specialised in railway testing, inspection and certification (CERTIFER) on the one hand, and engineering, consultancy and advisory services on the other hand (CERTIFER Solutions).

With more than 345 employees and 25 locations worldwide, CERTIFER is present throughout Europe, as well as in China, Turkey, Brazil, Australia, Canada and in the Middle East.

CERTIFER main services include safety assessment as ISA (Independent Safety Assessment) and AsBo (Assessment Body) and conformity assessments as NoBo (Notified Body) and DeBo (Designated Body).

At **CERTIFER**, we are global leaders in the railway sector, delivering cutting-edge independent safety assessment, independent certification, systems engineering and safety assurance services across the rail industry. With a commitment to excellence, we work with major transport stakeholders to ensure the highest standards of quality, safety, and risk mitigation in rail networks worldwide.

What We Do:

As part of a dynamic and forward-thinking team, CERTIFER leads projects in **certification, assessment, testing, and validation of railway systems**, including high-speed, urban, freight, and autonomous rail operations. Our expertise spans all rail technologies, including **signalling, rolling stock, infrastructure and Operations & Maintenance (O&M)**, driving innovation that makes rail transport safer and more efficient.

Why Join Us?

At **CERTIFER**, we believe in empowering our people to **innovate, collaborate, and grow**. Here, you'll have the opportunity to work on high-impact projects, **shape the future of rail safety**, and collaborate with industry leaders across the globe. Our team fosters a culture of **continuous learning**, where your professional development is supported, and your ideas are valued.

Join a company where **passion for rail safety** meets technological innovation and be part of a vibrant community that's shaping the future of rail transport. Together, let's make rail travel safer, smarter, and more sustainable for everyone.

As part of **CERTIFER**, we are present in over **25 countries and have been a key player** in the successful delivery of major and complex Trams, Metro and High-Speed Railways systems that **safely move millions of commuters every year**.

Does this role resonate with **your experience and career development ambition**? We would love to hear from you!

Safety Assessor - Based in Nordics

Position Overview:

As a Safety Assessor, you will start with discipline assessment and take part in several projects. You could be in a position today as technical expert, design engineer or discipline engineer, with no or limited assessment experience, and you are thinking about taking your next step into a new interesting way of utilising your skills.

With Certifer you will work with discipline assessment within one or more areas. It is likely you will work with both CSM-RA assessment and TSI verification activities. Through your development, we offer structured career development tailored with your skills and ambitions. As a part of a team, rapidly growing and being part of a much larger international group, we can offer plenty of opportunities.

Key Responsibilities:

- You possess integrity, while at the same time know how to balance with flexibility, when its needed and possible
- You know the importance of communication and you always keep an eye open to develop your skills and look for new knowledge
- You possess independence and autonomy that enables you to interact with colleagues and clients on a result-driven basis
- You are willing to learn and grow in your role
- You know the importance of administration, structured work and documentation, and you manage this effortlessly

Skills and Experience:

- You possess Swedish, Danish or Norwegian language skills (verbal/writing) on mother tongue level or very fluent
- You are a team player
- Process oriented, quality focused, analytic skills
- Curious, pro-active and a finisher
- You possess an independency and autonomy that enables you to interact with colleagues and clients on a result-driven basis

Qualifications:

- An academic degree, for example as engineer is a plus. However, this is not a strict requirement
- Experience in rolling stock: vehicles, tramway, metro, yellow fleet/OTM, locomotives wagons/coaches
- Experience in Energy: catenary, third rail, supply stations, high voltage
- Experience in Infrastructure: Tracks, slab track and ballasted, constructions, geotechnics, drainage
- Experience in Signalling: ETCS, CBTC, Cybersecurity or legacy signalling systems
- Experience in Railway, metro, tramway,
- Fluent in English and any other Scandinavian languages (i.e., Danish, Norwegian or Swedish).

You could be based anywhere in Denmark, Sweden or Norway, if you are willing to travel for client and office meetings, when needed.

In a nutshell

- An interesting and satisfying job where you can make a difference.
- An important work, where the clients depend on you.
- A challenging work in an international environment.

At CERTIFER, you will find colleagues who value a fun, dynamic and good working environment which makes it possible to:

- Grow quickly in your area of expertise guided/mentored by other experienced colleagues
- Have an open work atmosphere where you can tailor your own personal development
- Provide room for new ideas and individual initiatives from each team member
- Have fun at work

CERTIFER further values:

- Provide its employees with attractive employment conditions
- Flexible work conditions, good IT tools, work-from-home arrangement and more
- A personal approach to each employee which fits with his/her career goals and work/life balance

If you're passionate about rail systems, thrive in a collaborative environment and have the experience to lead cutting-edge rail technology projects, we want to hear from you!
