certifer.eu

CERTIFER is a certification group founded in France in 1997, specialising in testing, inspection and certification in the railway sector (CERTIFER), as well as engineering, consulting and technical support services (CERTIFER Solutions).

With more than 420 employees across 27 offices worldwide, CERTIFER operates throughout Europe and has a presence in China, Turkey, Brazil, Australia, Canada and the Middle East.

CERTIFER is a global leader in the railway sector, providing state-of-the-art independent safety assessment and product and system certification services. Committed to excellence, the Group works closely with key players in the transport industry to ensure the highest standards of quality, safety and risk mitigation across railway networks worldwide.

Our activities

Do you want to be part of a local team within a global organisation where your skills and expertise matter? Then this could be the opportunity for you.

We are experts in rolling stock, infrastructure, energy and signalling. We inspect and certify safety and compliance with regulations such as CSM-RA, RAMS and TSI. Our reports and certificates support authority approvals across the Nordic countries and Europe.

6 open positions

We are currently looking to strengthen our team with six professionals across the CCS, RST, and INF/ENE areas in Nordics (Denmark, Norway and Sweden).

We welcome both experienced professionals and candidates with less experience who are looking to further develop their expertise within the railway industry.

In addition, we are also seeking one or more experienced Project Managers to join our team.

Do you have experience in one or more of the areas below? We would love to hear from you!

- **Rolling Stock:** Vehicles, tramways, metros, yellow fleet/OTM, locomotives, wagons and coaches
- **Energy:** Catenary, third rail, power supply systems and high voltage
- **Infrastructure:** Track, slab and ballasted track, structures, geotechnics and drainage
- **Signalling:** ETCS, ATC/ATC2, CBTC, legacy signalling systems and cybersecurity
- **Railway Systems:** Experience from railway, metro or tramway projects

As a third part assessor in NoBo, AsBo and DeBo within the railway and mobility sector, you will work closely with customers, colleagues and industry stakeholders, contributing to both technical assessments and project delivery.

Your responsibilities will include:

- Managing and coordinating projects from start to completion
- Contributing to technical and commercial proposals
- Performing detailed technical assessments and related systems

- Collaborating with customers, assessment bodies and railway safety authorities
- Ensuring compliance with quality processes and applicable standards
- Taking part in both Scandinavian and international railway projects
- Conducting on-site inspections and project audits
- Preparing clear and comprehensive technical reports
- Supporting continuous development of our services and expertise

It is an advantage if you have:

- Experience in railway engineering and project management
- Good knowledge of railway regulations, TSIs and relevant CENELEC standards
- Familiarity with CSM-RA and the EU Modules Decision
- Fluency in at least one Nordic language; additional European languages are a plus
- Strong communication and customer-facing skills
- The ability to work independently and collaboratively, prioritize tasks and meet deadlines

Project Manager

As a Project Manager at Certifer, you will work closely with our clients to ensure successful project delivery, effective planning and clear communication. You will act as the main point of contact for the client and take overall responsibility for project coordination and execution.

Through proactive follow-up and structured project management, you will oversee project plans, agreements and milestones, while identifying and managing risks and changes both internally and in collaboration with our clients. You will maintain a clear overview of your projects, prioritise effectively and ensure that deliverables are completed on time and to the expected quality standards.

We are looking for a resilient, proactive and people-oriented professional who can build strong client relationships and facilitate open and professional communication. You have a good understanding of railway, metro and/or tramway systems, including relevant subsystems, legislation and quality management. Working closely with our technical leads, you will ensure that the technical scope, professional requirements and quality criteria are consistently met.

Project Management is a key part of Certifer’s business, and we offer excellent opportunities for both local and international career development within Certifer Nordics and the wider Certifer Group.

Make an impact – Grow with us!

At Certifer, you will have the opportunity to work on meaningful and challenging projects where your expertise makes a real difference. Our clients rely on us to deliver high-quality solutions, giving you the opportunity to take responsibility and have a tangible impact.

You will become part of an international organisation while working closely with a local, supportive team. We value collaboration, knowledge sharing and a positive working environment where people enjoy what they do.

At Certifer, you will have the opportunity to:

- **Develop your expertise** – Grow quickly within your field, supported and mentored by experienced colleagues.
- **Shape your career** – Take ownership of your professional development and explore opportunities that match your ambitions.

- **Make an impact** – Bring your ideas and take initiative in an environment where your contribution is valued.
- **Work internationally** – Collaborate with colleagues and clients across the Nordics and the wider Certifer Group.
- **Enjoy your work** – Be part of a dynamic and friendly team where professional challenges are balanced with a great team spirit.

We invest in Our People

We believe that our employees are our greatest asset. That is why we offer attractive employment conditions and a flexible working environment designed to support both your professional development and work-life balance.

This includes:

- Flexible working conditions and the possibility to work from home
- Modern IT tools and the resources you need to succeed
- A personal approach to career development and individual goals
- Opportunities for both local and international career growth
- A supportive and inclusive working environment where people can thrive
